

Memotech Owners Club  
13 COPSE ROAD  
TOWNHILL PARK  
SOUTHAMPTON

## CLUB INFORMATION SHEET

May we take this opportunity to inform you of the existence of a club which is dedicated to supporting the Memotech Series of computers. The reason for our formation was the apparent lack of articles for the Memotech in the national magazines, which we felt to be a great shame as the Memotech Series are such good machines.

We have been formed since May 1984 and have been producing newsletter/magazines since September 1984. Our club has a very active membership with many members contributing magazine articles and programs for our growing public domain program library. Also, the software houses linked with the Memotech have been very generous with support and tapes for reviews.

In each of our 10 issues per year, we try and cover a least one Basic and one Assembler article, the Program Library, which now contains over 60 program, (Review lists available, please send an SAE), also contains programs which are too long to print and hence type in by hand, we have found the Library a very good means of distributing 'bug-free' programs. In general the magazine contains the following:-

- \* Programs (ours and yours)
- \* Software/Hardware Reviews
- \* Queries, Letters, Hints & Tips
- \* Competitions
- \* News from other clubs and club formations.
- \* Articles to help with the understanding of Basic and Assembler programs
- \* Any articles of interest from members
- \* Interfacing Projects
- \* Program Library (Over 70 Programs)

We are just forming a club software label, which will be reserved for 'top quality' software, initially we will have four titles available, these are:-

- |                                |       |                                |       |
|--------------------------------|-------|--------------------------------|-------|
| * Fig-Forth - By Dave Thompson | £6.00 | * MTX Assembly Language Course | £7.00 |
| Tech Data sheets               | £2.00 |                                |       |
| Tutorial Book (240 pages)      | £7.50 |                                |       |
| * Reveal - By Andy Key         | £6.00 |                                |       |
| * SMGII - By Andy Key          | £6.00 |                                |       |

It should be noted that the primary objective of the club is to set up a link for Memotech owners, to communicate with each other through the magazine.

Membership fees are £8.00 a year for UK membership (For foreign membership details please send in a SAE), this fee covers the production and posting of 10 magazines a year, the club running costs and funding of programs and projects. Please make all cheques sterling and payable to MEMOTECH OWNERS CLUB, and remember to print your name, address and post code clearly.

MEMOTECH OWNERS CLUB  
PROGRAM LIBRARY

This is the list of all the programs available on cassette and disc. The costs are: £1.20 for two programs on cassette (we supply the tape) and £2.50 on disc for 20 programs (or £3.50 if you want us to supply the disc). When ordering for discs please state clearly what memory capacity you work on (100K to 1Meg).

Disc 1 starts here.

- |                      |                                   |
|----------------------|-----------------------------------|
| 01. Hex/Dec/Bin      | Number conversion program.        |
| 02. CGEN             | Sprite Generator.                 |
| 03. 3D-Draw          | Rotate a cup & saucer in 3D       |
| 04. Whist            | Card Game                         |
| 05. Mem-Save         | Saves/Loads memory from tape.     |
| 06. MTX-Draw         | Basic drawing board               |
| 07. LOGO-Draw        | Turtle graphics drawing board.    |
| 08. Simplex Tableau  | Applications Program.             |
| 09. Breakeven        | Applications Program.             |
| 10. Statistics       | Applications Program.             |
| 11. Unsolved Problem | Applications Program.             |
| 12. Radio Routines   | Learn about Radio Electronics.    |
| 13. Light Cycles     | Arcade Game (TRON).               |
| 14. Hex/Dec/Bin      | USER commands conversion program. |
| 15. Character Ed.    | Sprite Generator.                 |
| 16. Quasimodo        | THE classic arcade game.          |
| 17. Planner          | Another Sprite Generator.         |
| 18. Hanoi            | Classic Puzzle - good graphics.   |
| 19. Noble            | Simple text game.                 |
| 20. Hi-Lo            | Higher or Lower card game.        |

Disc 2 starts here.

- |                 |                                  |
|-----------------|----------------------------------|
| 21. Composer    | Sound Generator.                 |
| 22. Anova       | Applications Program.            |
| 23. Cashflow    | Applications Program.            |
| 24. Reversi     | Strategy Board Game.             |
| 25. Fulltime    | Football manager game.           |
| 26. Panel 3     | Panel extensions.                |
| 27. Word Pro    | Word Processor.                  |
| 28. Sw Mice     | Arcade game involving mice.      |
| 29. TNT TIM     | Very good assembler arcade game. |
| 30. Sw3D-FUNC.1 | First of two. Saturn.            |
| 31. Sw3D-FUNC.2 | Second one! Sinpr?               |
| 32. SwSpr-Ed    | And another Sprite Generator.    |
| 33. SwI-WandI   | Number Base Conversion program.  |
| 34. OXO         | Noughts & Crosses.               |
| 35. Solitaire   | Strategy game.                   |
| 36. Cross-Num   | Excellent strategy game.         |
| 37. Avoid Seven | Dice game.                       |
| 38. Numerology  | Name analysis.                   |
| 39. Chemin      | Another dice game.               |
| 40. Dice        | Another, Another dice game.      |

Disc 3 starts here.

- |                         |                               |
|-------------------------|-------------------------------|
| 41. Reversi 2           | Assembler version of 24.      |
| 42. ISOT                | A really good maze game.      |
| 43. DBase               | Simple database.              |
| 44. Diary               | Diary & Addresses Program.    |
| 45. Terminal            | Comm's via RS232 & modem.     |
| 46. Skittles            | Keeps league tables.          |
| 47. Card-Ind            | Prodcues card indexes.        |
| 48. 2 * H&W             | Large character printing.     |
| 49. Hangman             | A classic                     |
| 50. Account             | Third accounts package.       |
| 51. Mastermind          | Another good game.            |
| 52. Connect 4           | Two player game.              |
| 53. Journey Into Danger | NEW adventure game.           |
| 54. Connect 4 V2        | As for 52.                    |
| 55. Patience            | Card Game.                    |
| 56. Life                | Odd Puzzle.                   |
| 57. Enigma              | Like Mastermind.              |
| 58. FKEY                | Function key definer.         |
| 59. Skydiver            | Graphical game.               |
| 60. Digger              | RockFall or Repton type game. |

Disc 4 starts here.

- |                   |                                  |
|-------------------|----------------------------------|
| 61. MFB           | Calculates fuel consumption.     |
| 62. Spooler       | Dumps Panel & VS 4 to printer.   |
| 63. Labels        | Label printing program.          |
| 64. Ski Version 2 | Update of published SKI program. |
| 65. PNT/BJCK      | Card game compendium             |
| 66. Biorythms     | Day forecaster                   |

Cassette ONLY Software

- |       |               |                             |
|-------|---------------|-----------------------------|
| CA01. | Renum         | Renumbers BASIC programs.   |
| CA02. | Merge         | Merges BASIC programs.      |
| CA03. | Money Manager | Home Accounts package.      |
| CA04. | FKEY          | Defines Function Keys.      |
| CA05. | DBase III     | Advanced database program.  |
| CA06. | Filetech      | Great database program.     |
| CA07. | Flight        | Brilliant Flight Simulator. |
| CA08. | RawDisc       | Better than sliced bread.   |
| CA09. | TextEd        | Assembler Word Proc.        |
| CA10. | Deci_Clock    | Brilliant Clock program.    |

Disc Software

- |      |               |      |                  |
|------|---------------|------|------------------|
| CPM1 | Z80 ASSEMBLER | CPM2 | EBASIC PROGRAMS  |
| CPM3 | MAIL LABEL    | CPM4 | TURBO PROGRAMS   |
| CPM5 | COMMS DISC    | CPM6 | SMALL C COMPILER |

Don't forget the compilation disc at £1!

All cheques made payable to MOC please.

GHOSTLY CASTLE	3.80	REVERSI	8.80		
GOLDMINE	7.70	ROLLA BEARING	7.70		

## INTEFACING PROJECTS

The club has currently available two interfacing projects which make use of the MTX's internal expansion port. The first the LED kit is designed to introduce you to the world of electronics and interfacing whilst the second being a little more complex is much more interesting to build and program. It is suggested that if you have no knowledge of electronics that you first try the LED kit to gain some experience. The kits require the use of an interfacing cable which is also available, you only require one cable.

### Interface price list

A full set of components and instructions for the LED kit -->£6.95  
A full set of components and instructions for the Speech Synthesiser kit -->£18.00

Connecting cable for the internal port (needed for projects) -->£4.50  
All kits are constructed on Vero board!!!

All prices are fully inclusive. Please allow 14 days for delivery and make cheques sterling and payable to MOC. Add 15% to all prices if you are not a member of MOC.

We have found a supplier of DMX80 ribbons thanks to John Friis from Bristol. Having tested a ribbon out over the past month, we have found that it has behaved very well and it appears to be lasting as long as the genuine ribbon, it's only slight fault could be that the printing goes slightly lighter when it is used for really heavy printing, it does however return dark when used intermittantly. For anyone who has ever had a DMX ribbon to bits, this ribbon employs a slightly different inking technique, a tube of ink presses against a wheel around which the ribbon is passed over thus inking it ready for its next pass through the print head.

We can offer them for only £7.00 each, so why not order one today and be prepared for the day your ribbon finally 'bites the dust'!!!

ooo 000 ooo

The program library is an ever growing list of members programs, to date we have over 60, the programs are available only through the club at £1.20 per cassette, two programs recorded on a cassette, and the club supplies the cassette (good value I hope you agree!!). Subjects vary from games, to applications, utilities etc. For lists and reviews of all the titles available please enclose a SAE large enough for 10 sheets of paper. The programs are also available on diskette at £2.50 per disc, please send a formatted disc stating machine. We currently have two discs full and are working on filling the third. The library also contains a list of useful articles, ranging from programming the VPD to RST 10 codes, Neword Commands and Disc drive reviews.

For the latest details concerning ordering programs please use the most recent magazines.

ooo 000 ooo

We have negotiated with John Grayson and have come up with a fantastic £3 off of his MTX Assembly Language Course. This package which comprises of 7 programs and a 60 page manual, is the only machine specific Z80 course available for the MTX.
